NIRMAYEE S. KADAM PRN-25070521134 SEC-C1

EXPERIMENT 1.1.1- AREA OF CIRCLE

ALGORITHM:

Start

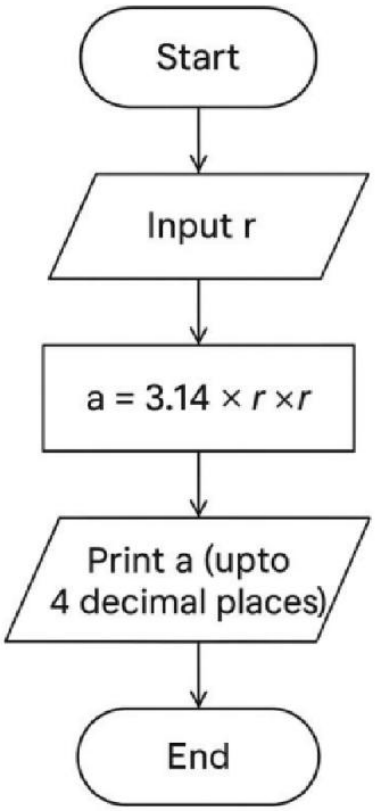
Input: Read the radius (r).

Process: Calculate the area by multiplying 3.14 * r * r.

Output: Print the result (formatted to 4 decimal places).

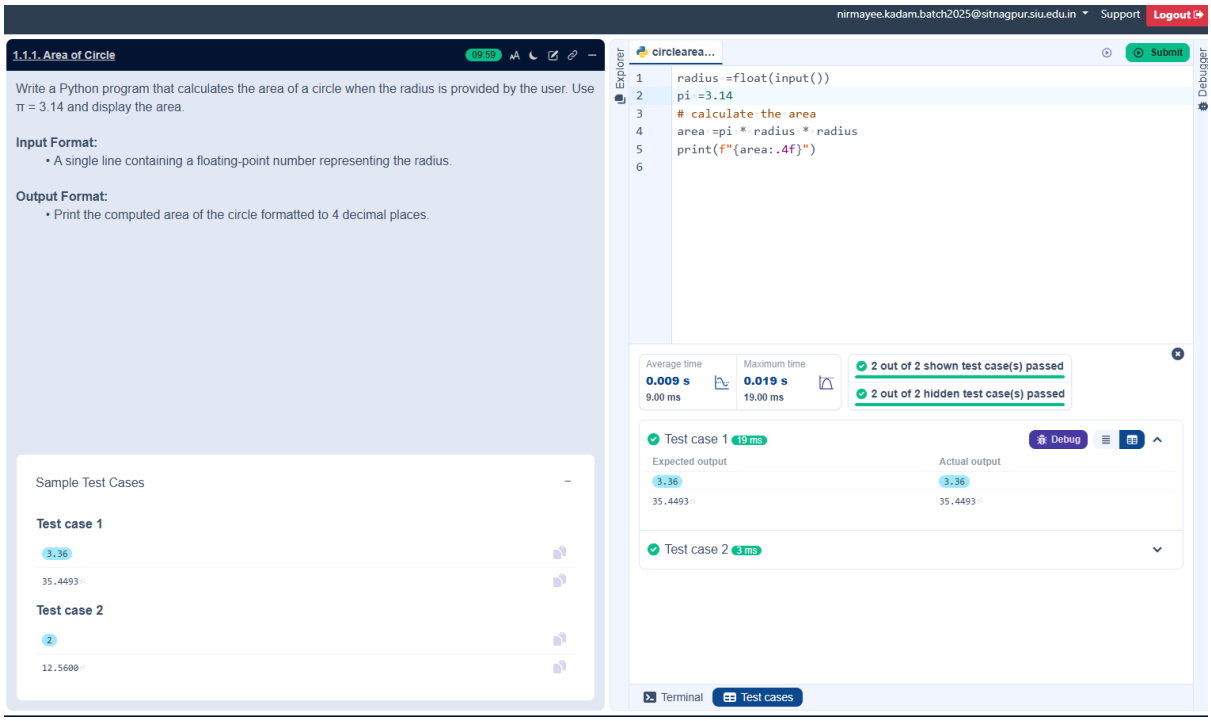
Stop

FLOWCHART:



NIRMAYEE S. KADAM PRN-25070521134 SEC-C1

CODE:



NIRMAYEE S. KADAM PRN-25070521134 SEC-C1

EXPERIMENT 1.1.2- AREA OF RECTANGLE

ALGORITHM:

Start

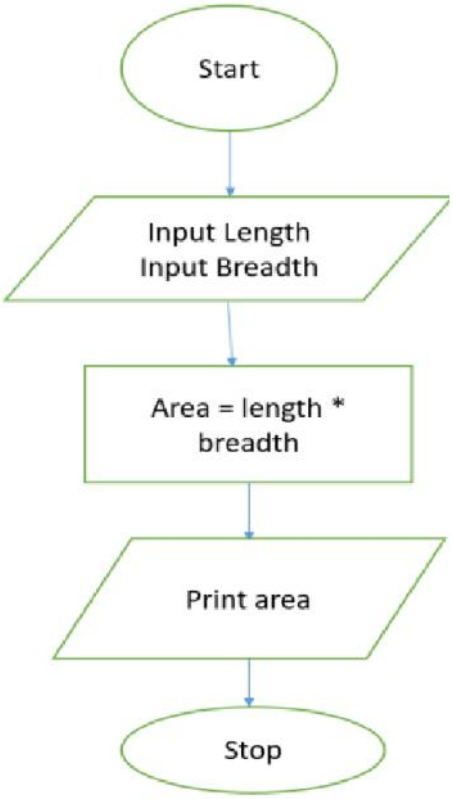
Input: Read length and width.

Process: Calculate the area by multiplying length *width.

Output: Print the result (formatted to 2 decimal places).

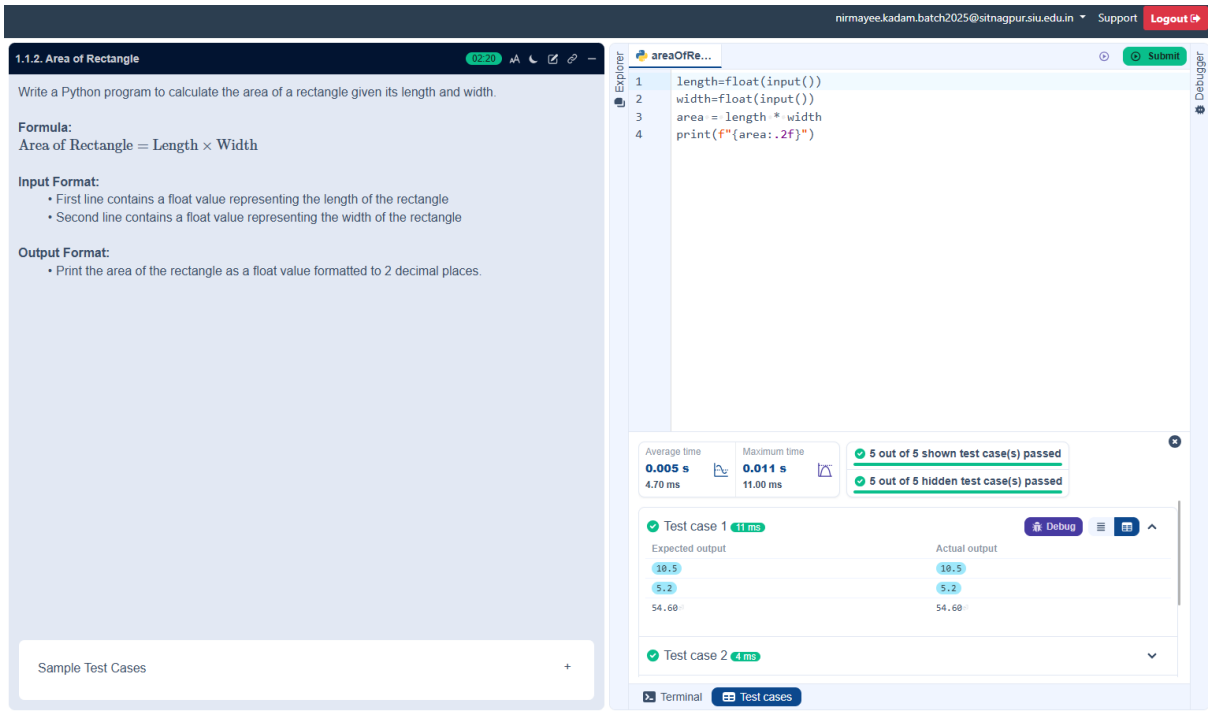
Stop

FLOWCHART:



NIRMAYEE S. KADAM PRN-25070521134 SEC-C1

CODE:



NIRMAYEE S. KADAM PRN-25070521134 SEC-C1

EXPERIMENT 1.1.3- CALCULATE AREA OF SQUARE

ALGORITHM:

Start

Input: Read the value for side_length from the user.

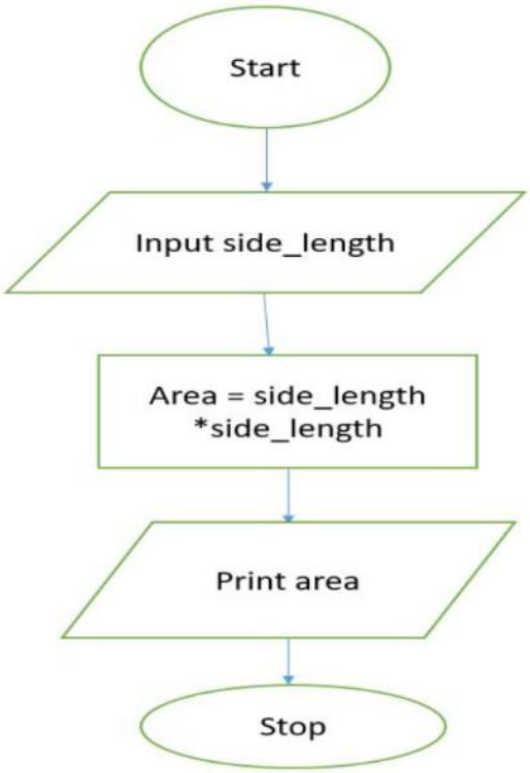
Process: Convert the input value to an integer.

Calculation: Calculate the area using the formula: Area = side_length^2

Output: Print the calculated area.

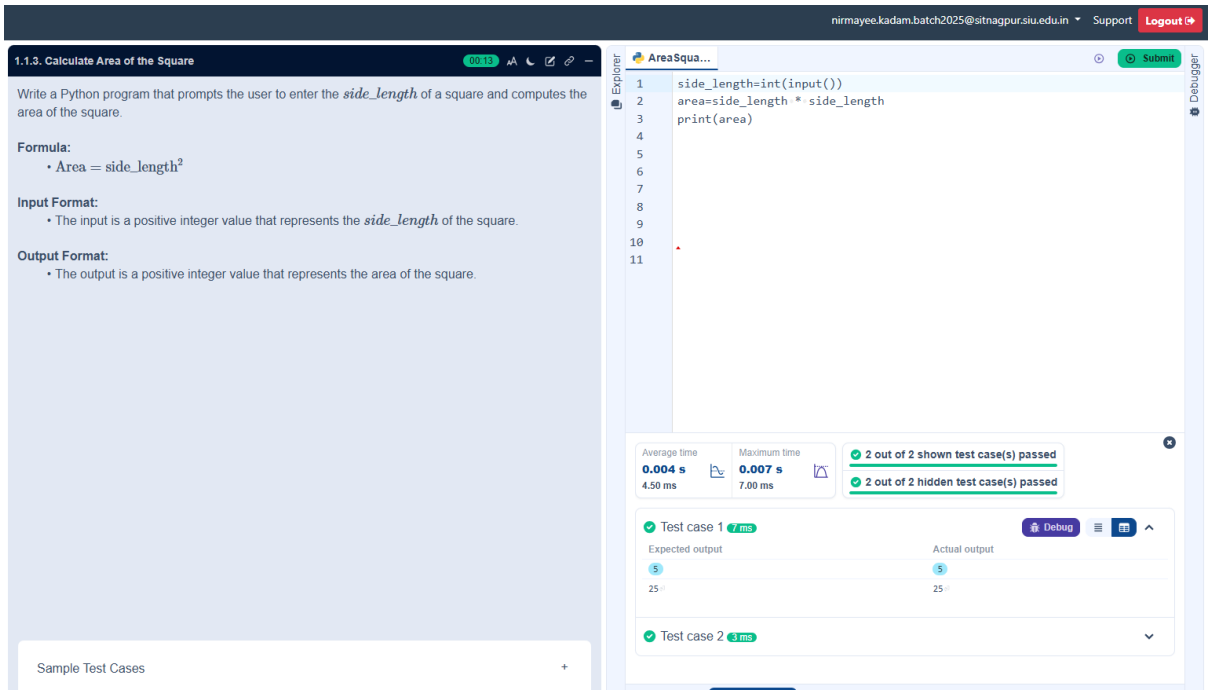
Stop

FLOWCHART:



NIRMAYEE S. KADAM PRN-25070521134 SEC-C1

CODE:



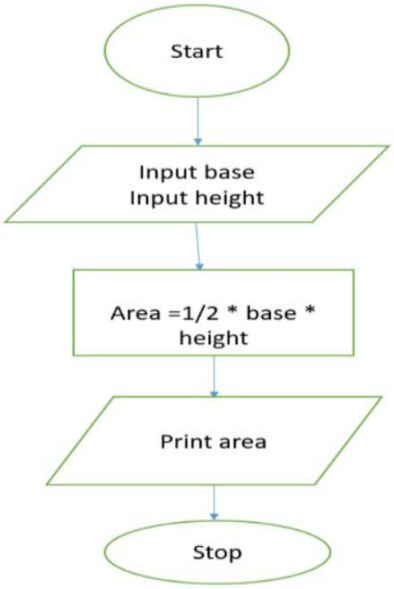
NIRMAYEE S. KADAM PRN-25070521134 SEC-C1

EXPERIMENT 1.1.4- AREA OF TRIANGLE

ALGORITHM:

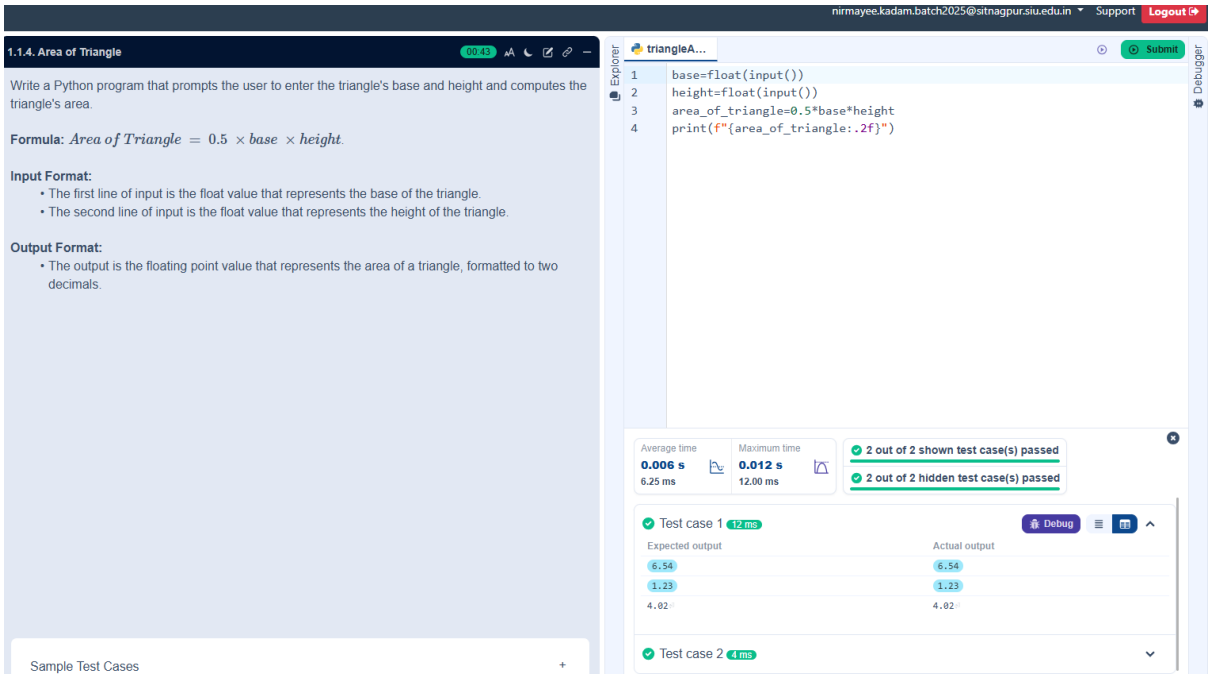
- Start
- Input base
- Input height
- Compute area = 0.5 × base × height
- Display area (rounded to 2 decimal places)
- End

FLOWCHART:



NIRMAYEE S. KADAM PRN-25070521134 SEC-C1

CODE:



NIRMAYEE S. KADAM PRN-25070521134 SEC-C1

EXPERIMENT 1.1.5- STUDENT PASS OR FAIL STATUS

ALGORITHM:

Start

1. **Read** the student's marks (let's call the variable marks).
2. **Check** if marks is greater than or equal to the passing threshold (e.g., 40).
3. **If condition is True:**
4. Print "PASS"
5. **If condition is False:**
6. Print "FAIL"
7. **Stop**

FLOWCHART:
